

Welcome To Mindmatch

- Ever been unable to correctly, quickly and efficiently find trusted doctors or lawyers for reliable opinions, senior professionals ready to give you career switch advice or business partners you can rely on?
- Spending tons of time and effort reaching out to people individually for references, browsing through unknown or incomplete social media profiles of connections or deciding on strangers based on anonymous online reviews?
- What if this person you seek is a colleagues' brother, a best friend's neighbour or your aunt's school friend who you are oblivious to and miss considering?
- What if you had a way to find them, know how you are connected to them and reach out to them with introductions all at the click of a few buttons? And vice versa?

You can soon!

We are building a relationship first social engine that gets you trusted experts through your own growing extended network while relentlessly cutting out spam and making sure you never stop in your endeavours due to lack of contacts.
